

OHIO MODULAR SEATING RANGE

Ohio single seater
32.7"H | 21.7"W | 32.5"D
Seat height: 17.8"
Weight: 70.5lbs

Fire
retardant

Optional
bolting system

Seat static
weight tested

KEY FEATURES

- Standard reinforcement provides strength and durability
- Versatile modular design helps you make the most of your space
- Comes with reduced-ligature solid ski feet as standard, which protects flooring and facilitates movement
- Strength and stability tested for severe contract use
- Seat static weight tested to internal standards to 1100 lbs.

MATERIAL/FABRICATION

The main frame is manufactured from a combination of particle board and plywood, providing strength and stability. Ohio features a solid ski leg in solid birch wood with clear matte lacquer finish as standard.

The Ohio range is engineered for modular configuration and ease of relocation. Each unit incorporates a clearance gap beneath the frame to facilitate cleaning and visual inspection. An optional solid tapered plinth base is available to remove floor gaps entirely, helping to prevent debris accumulation and aid in cleaning and maintenance.

Ohio standard internal support webbing is produced from TPU (Thermoplastic Elastomer) for flexibility and longevity. Additional materials used in the standard Ohio range comprise PVC and high quality PE components, ensuring consistent performance and durability. Assembly uses tamper-resistant security fixings for added safety.

All cushioned sections are fixed to the base and constructed using CMHR (Combustion Modified High Resilience) fire-retardant foam, compliant with fire safety regulations while maintaining comfort and durability.

TEST STANDARDS

- Strength & stability tested BS EN 16139:2013 Test Lvl 2
- Fire retardant to BS 7176:2007 source 5
- DIN 66084:2021-02 (BS 5852 Source 7 fabrics only)
- ANSI/BIFMA X5.4:2020
- Flammability tested BS 5852:2006
- Internal testing - Seat static load tested to 1100 lbs.

COLOUR/FINISH

Ski legs/plinth come in solid birch wood with clear matte lacquer finish as standard

FABRIC

Available in a wide choice of fabrics including Vinyl, Waterproof, Non Waterproof, Leather and Loose Cover

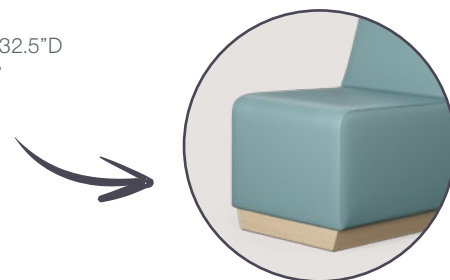

OPTIONS

- Available as a Plus model for additional reinforcement
- Arm section available with Ohio Plus range, but can be secured to both standard and Plus ranges
- Modules can be securely bolted together
- Also available with solid tapered plinth base (as below)

INSTALLATION/FITTING

The Ohio range is designed for modular use, with most units requiring no fixed installation (unless required). Modules can be standalone and easily reconfigured to suit varying layout arrangements.

The Ohio Plus arm is not suitable for standalone use and must be bolted to an adjacent unit to ensure structural stability. Please refer to the installation guide or contact our customer care team for further assistance.

LINKING OHIO TOGETHER

All framework components are supplied with pre-drilled alignment holes, enabling simple bolt-together assembly without the need for additional connecting plates. This ensures a precise fit and a clean, professional finish.

Installation and commissioning should be performed only by authorized and qualified personnel to ensure product integrity and compliance with safety standards.

CARE & MAINTENANCE

Regularly inspect all components for signs of wear, damage, or loose fixings. Access and maintain any fittings periodically to maintain stability and safety.

Always ensure you have assistance to help move heavy weighted furniture or take care to use appropriate handling equipment when moving units.

To clean wood veneer surfaces: Wipe clean with a damp, soft cloth. Avoid abrasive cleaners, solvents, or excessive moisture.

Vacuum upholstery regularly using a soft brush attachment to remove dust and debris. Clean spills immediately with a damp cloth and mild detergent.

Visit our care guidance section on the website or contact our helpful team for more information.
