

KEY FEATURES

- Helps to reduce excessive noise by deflecting and absorbing sound waves
- Designed to minimize ligature risks and prevent climbing
- Adhesive installation method (no fixing components) help to maximize safety
- Customizable design allows for endless configurations
- Reduces reverberation time from 5.57s to 3.07s at 500Hz

MATERIAL/FABRICATION

Excessive noise levels in mental health environments can cause additional stress which is detrimental to treatment and recovery. We designed Hush acoustic tiles to minimize the negative effects of unwanted noise, while taking care to minimize ligature risks and maximize safety for mental health spaces.

Thermo pressed Cork acoustic panel, Hush tiles are carefully designed to reduce excessive noise levels. By using an adhesive fixing method, risks associated with metal fixings are minimized.

Acoustic cork has excellent sound-absorbing properties and is also a great insulator. It's lightweight as well as fire, water and weather resistant.

TEST STANDARDS

- Fire retardant to BS 5852:2006 Clause 12 (Source 0 and 1)
- Acoustic testing BS EN ISO 354:2003

OPTIONS

- Choose from 7 versatile colors
- Customizable design allows for endless configurations

COLOR/FINISH

This product is available in 7 color options. (colors must be bought at a MOQ of 4). Color options are; Raw, Copper, Gold, Light Grey, Moss, Deep Sea and Blush.

ASSEMBLY

Arrives assembled and ready to install
