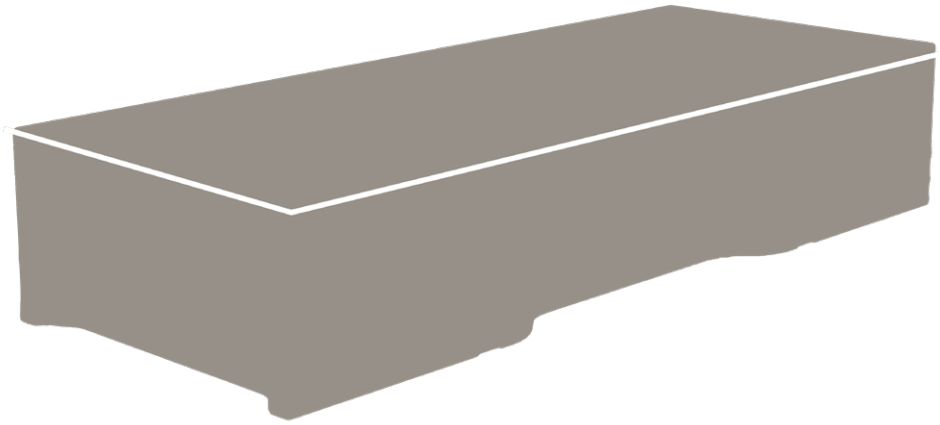
RYNO® CUBE BED → FLOOR FIXING



These instructions apply only when fixing to a concrete floor with no obstructions (e.g. under floor heating, cables, plumbing, etc.). When fixing to any other surface,or with obstructions, please contact your Pineapple representative for further advice.

N.B if fitting against coving there are several options to create a safe installation:

- *Cut the coving in the area that the bed sits in*
- *Trim the base of the bed to fit the coving*
- *Push the bed as close to the wall as possible and infill the gap*

REQUIRED ITEMS

- 4 x fixing templates
- 4 x floor brackets
- 4 x locking bolts
- 4 x 8mm filler rod
- 4 x 8mm filler rod
- 4 x flat metal plates
- 8 x M10 bolts

Only provided with the floor fixed version

- Masking tape
- 8mm wood drill bit
- 16 x concrete hardware fixings
- 5mm Allen key

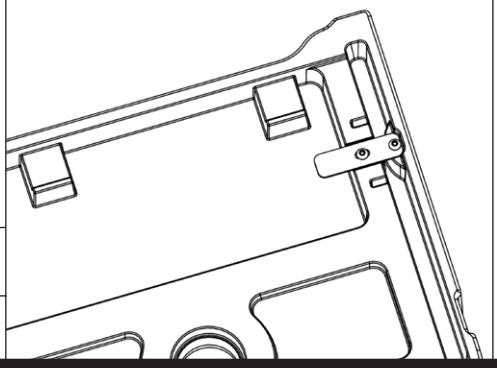
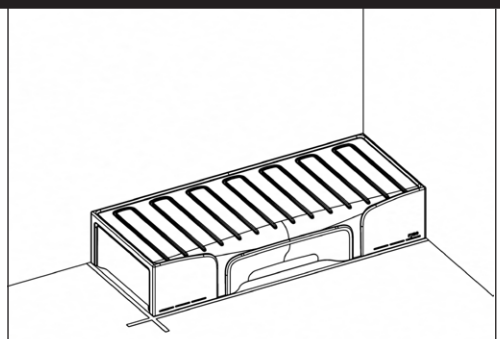
RYNO® CUBE BED → FLOOR FIXING

01

Attach the 4 x flat plates to the underside of the bed with the supplied M10 bolts



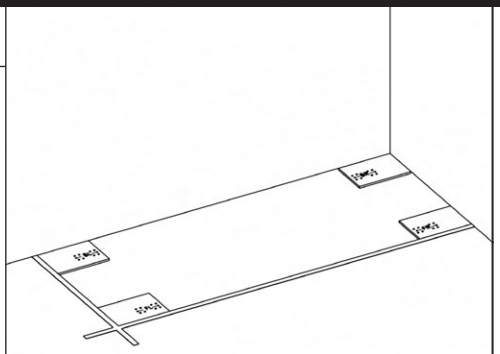


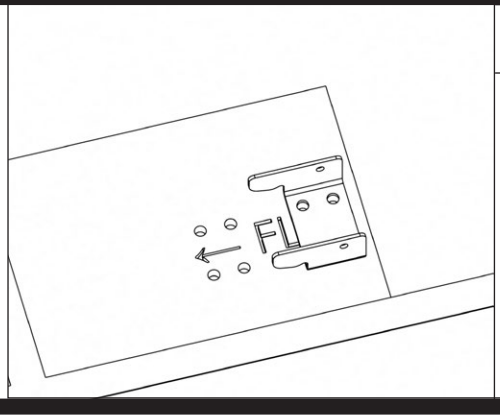
02

Place bed in desired location and mark its outline with masking tape. Use the overhanging edge of the bed as the guide

03

Remove bed and place the fixing templates onto the floor at each corner of the marked area. Templates are marked; FL-Front Left, FR-Front Right, BL-Back Left, BR-Back Right. (The front of the bed has the recessed area for sitting)





04

Using the template mark then drill the floor in each bracket location with the x4 fixing points. Take note of the bed sliding direction – as marked with the arrows. (The bed slides under the brackets from left to right in this example)

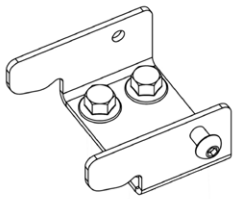
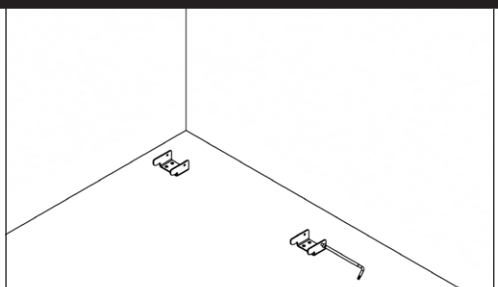
RYNO® CUBE BED → FLOOR FIXING

05

Remove the templates and bolt the brackets to the floor using appropriate hardware fixings



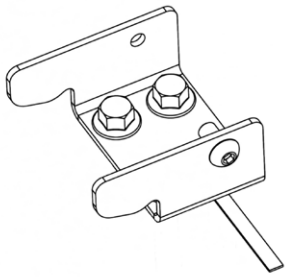


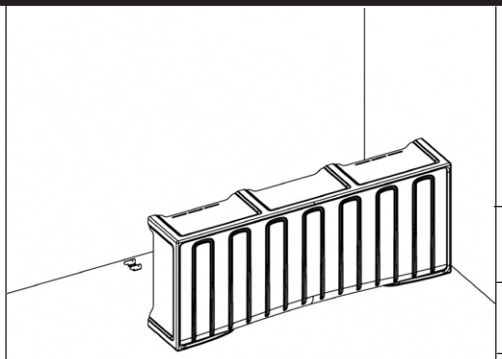
06

Insert locking bolt facing outwards into one or both front brackets (FL or FR) and screw in only a few turns. (All 4 locking bolts can be used if only the head end of the bed is against a wall)

07

Use masking tape to mark the locations of the locking bolts on the floor. This will help to indicate where the holes will have to be drilled





08

Lie bed on its front face and 40mm to the left of its final position

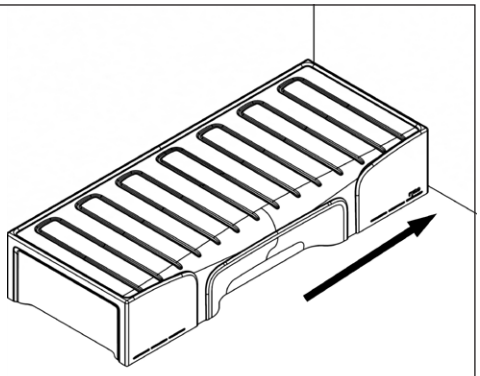
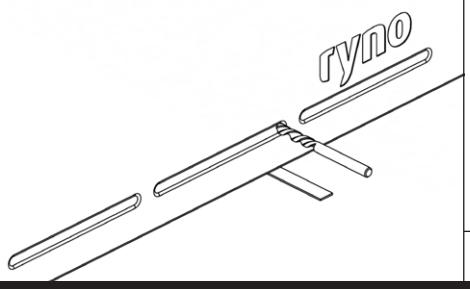
RYNO® CUBE BED → FLOOR FIXING

09

Lower the bed over the brackets and push lengthways 40mm so that it hooks into place



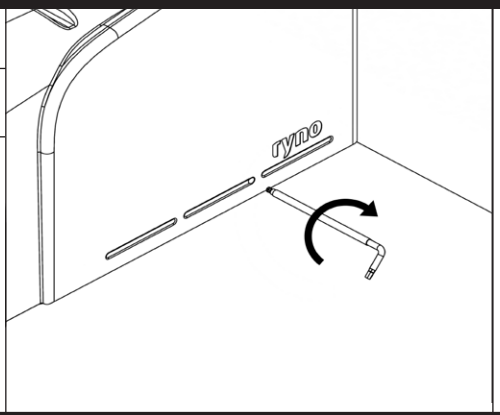


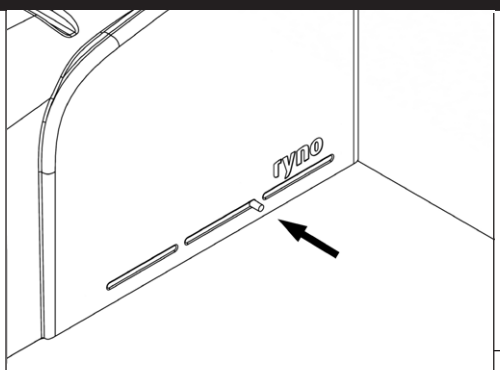
10

Drill though the side of the bed in line with where the locking bolts will be (use 8mm wood drill bit). Clear out any plastic swarf (bed may need to be removed for this). The drilling hole will line up with either end of a 'slot' indent feature.

11

Insert the Allen key and find the head of the locking screws. Tighten until the screw stops turning. The bed should now be locked into place





12

Tap in the filler rod to block access to the locking screws
