

# FURNITURE FOR MENTAL AND BEHAVIORAL HEALTH ENVIRONMENTS

Designed for  
peace of mind

**Pineapple**

## IT ALL BEGAN IN

Our founder, William Hathorn, started our company in a workshop in London, England. Originally trading as Pine Productions, based on the popular wood we used to build our furniture, we crafted strong, durable products using traditional carpentry methods. But as our business grew and we began to provide furniture in a variety of materials for the healthcare market, the name no longer fit. So, with a nod to our beginnings, we took a bold step and became Pineapple.

As our reputation for designing for demanding environments grew, so did demand for our products and we soon expanded into new premises, doubling our production capacity. We started creating technically advanced furniture for secure settings like mental health units and prisons, as well as lower risk spaces like hospitals, healthcare and education facilities.

# 1975

# TODAY

## 50 YEARS OF INNOVATION

We continue to create innovative furniture to deliver real-life solutions for our customers and, from initial concept right through to manufacture and delivery, we have full control of the process. All of our designs are either manufactured by us or by our carefully chosen partners who produce our furniture under license to meet our precise specification and design.

While our business is now international and our vision more ambitious than ever, we're still a family business at heart. Our work ethic and attention to detail is exactly the same as when we started in 1975.

THE PINEAPPLE PROCESS

We listen

01

We listen more widely and more deeply to our customers' unique set of challenges; they might be safety concerns, maintenance issues or limited space. With fifty years of experience under our belts, we're good at listening and know the right questions to ask.

02

understand

Drawing on our extensive our knowledge gained over the last 50 years, we identify solutions that fit each brief. Then we define exactly what your furniture needs to deliver for your environment, taking physical, functional and emotional needs into account.

03

match

Now we understand your environment and precise needs, we can match you with the right products that will solve them. With hundreds of ranges to choose from, there is usually a solution that fits but if there isn't, we'll work with you to create one.

04

We deliver mindfully designed furniture that is exactly fit for purpose. We continue to learn from each new project, building the knowledge we gain into our new and existing product ranges to make them safer than ever.

deliver

# ON HAND TO HELP

Whether you need help making the most of your space, or to test the quality of our furniture for yourself, we're on hand to help your project run as smoothly as possible.

This vibrant campus is designed to be a safe, therapeutic space for young people on juvenile probation.

# RADIUS CAMPUS

RADIUS is a non-profit organization for young people on juvenile probation which aims to strengthen family and community relationships.

The campus provides 24 beds for youths aged between 12 and 18 years old, offering mental health and substance abuse treatment as well as building family support plans for their transition into the community.

In the vibrant community space, Rock tables and chairs provide space to work and play. The frames are made from solid Birch, cross-braced for strength, and the

table tops and seats are constructed from plywood, with a durable laminate surface.

Snug Plus modular sofas provide a comfortable place for residents to relax together in the TV lounge. Snug's reinforced construction ensures they are strong enough to withstand the rigours of challenging environments.

In the bedrooms, Harby Plus Open cabinetry provides safe and durable storage, with reinforced shelves and reduced-ligature design features as standard.

Creating a purpose-built, therapeutic environment for mental health care

# RIVER EDGE

River Edge Behavioral Health and Mercer University School of Medicine collaborated to create a first of its kind facility in Georgia. The new facility is set to offer care for those with disabilities that are both in and out of crisis.

Designed to provide both inpatient and outpatient services, the center places special focus on supporting those with histories of hospitalization or incarceration.

To furnish the inpatient spaces, the facility selected several products from Pineapple, known for their durability and reliability in challenging environments. Ryno products, in particular, were chosen for their lifetime warranty and robust performance.

Throughout the space, the Ryno Dining chairs bring a vibrant touch with 15 color options, allowing designers to tailor each room's palette. These chairs are paired with Ryno Activity, Games Top, and Combo tables which include optional hidden anti-tamper floor fixings to enhance security without compromising aesthetics.

De-escalation is a major focus in the facility's design. Pineapple's award-winning products such as the The Levo Recliner, Boden Rocker, and the Jak de-escalation couch were chosen to support this goal.

Pineapple is proud to have collaborated with River Edge Behavioral Health to furnish a space that prioritizes comfort, safety, and healing.

# TESTING

Our products are designed for use in challenging environments like mental health hospitals and correctional facilities.

In order to maximize safety for residents and staff, we conduct extensive testing, focusing on more extreme treatment than is typically covered in common test standards.

**Static load**

352lb static weight

During the seat and back static load test, downward force equivalent to 352lbs is gradually applied to the chair's seat. This static load is intended to reflect a user weight of 250lbs, who will likely impart a larger force when sitting down.

Drawers	Hinges	Stability
 <p>75,000 cycles</p> <p>In the above test, the drawer is filled with 77lbs of ballast and undergoes 75,000 cycles. If a drawer is opened and shut 5 times per day, that equates to over 40 years of use!</p>	 <p>66lb ballast</p> <p>10 cycles</p> <p>To assess the strength of door hinges, ballast is added and the door is opened and shut a number of times. In the above test, 66lbs of ballast is added to the door before undergoing 10 open and close cycles.</p>	 <p>22lb force applied with doors and drawers open</p> <p>The forward stability test ensures units don't tip over when doors and drawers are fully opened and an external force is applied.</p>

Durability	Impact
 <p>66lb force</p> <p>220lb force</p> <p>200,000 cycles</p> <p>Durability tests include a downward force equivalent to 220lbs applied to the chair's seat along with a horizontal force equivalent to 66lbs pushing on the chair's back to simulate the person leaning back. This process is repeated 200,000 times to simulate long-term use.</p>	 <p>233lb impact</p> <p>Impact tests are used to assess how a piece of furniture can withstand forceful movements. In the above test, a spring-compressed head rapidly applies a force of 1040N (equivalent to 233lbs) to the seat, and is repeated 200,000 times.</p>

**Armrest strength**

88lb force

For products with armrests, a number of strength and durability tests are conducted. During the armrest sideways static load test, a force equivalent to 88lbs is used to push the arms of a chair apart, repeating 10 times.

*How we go further:*

**Extreme static load**

TESTED TO WITHSTAND 1TON

To ensure our products can withstand enthusiastic use, we choose to exceed the typical 350lb static load applied for standard tests. We have tested many of our seating ranges to withstand 2,200lbs (1 ton) of static load with no signs of wear or damage.

**Extreme impact**

For products designed for high risk environments, we conduct sustained impact tests, striking the product with a sledge hammer for a duration of 5 minutes with approximately 240 forceful strikes.

240 strikes

# SAFE & SUSTAINABLE

Flame-retardant	Strength tested	Environmental
<p>Flame-retardant to contract level, all of our upholstery and fabrics meet CAL TB 116 &amp; 117, NFPA 260 USA.</p> <p>This allows you to purchase with complete confidence knowing that all our products and fabrics are fully tried and tested.</p>	<p>Our Ryno seating conforms to ANSI/BIFMA static load testing to a weight of at least 1,000 lbs.</p> <p>All of our furniture is also strength and stability tested to contract level.</p> <p>The picture below shows one of our sofas undergoing strength and stability testing. In this demanding test, seat and back durability is tested at least 100,000 times.</p>	<p>All the wood we use to build our furniture originates from responsibly managed forests.</p> <p>As supporters of good forest management, we use only suitably certified wood wherever possible.</p> <p>All our furniture is designed to last a lifetime, minimizing waste and our Ryno® range is also 100% recyclable.</p> <p>Our commitment to these ideals is demonstrated in our INT-COC-001353 and ISO 14001: 2015 awards, and our FSC® Chain of Custody certificate FSC-C015370. In addition, we are certified under PEFC Chain of Custody certificate INT-PEFC/COC-001353.</p> <p>FSC® certified products available upon request.</p>
		

A CHOICE OF  
COLORS BUT IT'S  
ALWAYS GREEN

# INFECTION CONTROL

**Ryno® products** are made from our unique polymer blend which contains an anti-bacterial additive to inhibit bacterial growth.

Unlike surface treatments which may wear away or become scratched, this anti-bacterial protection works throughout the product.

Our upholstery ranges include anti-bacterial treatments which physically damage the cell walls, with tests showing a 99.99% reduction in MRSA and a 99.98% reduction in E. coli over 24hrs.

A number of our products feature a hygiene gap between the back and seat of the chair which prevents dust and dirt becoming trapped, making them easier to clean thoroughly.

We apply an **anti-bacterial lacquer** to exposed wood surfaces which kills 99.9% of bacteria (including MRSA, C. diff and E. coli) within 24 hours by providing no source of nutrients which they need to survive.

Our Sovie bed ranges features a single-piece mattress tray with no joints (into which liquid may seep) and components are wrapped in a thermoplastic shell which kills 99.8% of E.coli and MRSA (most common hospital bacteria) over a 24-hour period.

# GUARANTEE & SERVICE

With our hassle-free White Glove delivery service, we place your furniture in individual rooms and take away all packaging, leaving you with furniture ready for use.

Over the past forty years we've built our business on providing the best products and service in our industry. We're proud of the strength of our products as well as the relationships we have with our customers.

## Giving you total peace of mind

Most of our furniture is guaranteed against **manufacturing faults for 7 years.**

Our superbly durable **Ryno® range comes with a lifetime guarantee.**

We pride ourselves on our aftercare service. Our support continues beyond the point of sale, going the extra mile to achieve complete customer satisfaction.

# THE FULL PACKAGE

Our extensive furniture range can be used to furnish all areas of a modern facility, helping to create a safer environment for patients, staff and visitors.

**Dining area**  
Stress can be heightened during mealtimes, so our furniture is designed to minimize conflict as well as withstand challenging behavior. Our Ryno® activity table can be weighted to prevent overturning and preserve safety.

**Quiet lounge**  
Modular reinforced seating like our Snug Plus range can help to encourage social inclusion, while soft foam Contessa shapes and cozy Boden bean bags provide a safe space for quiet reflection.

**Waiting area**  
Space efficient, easy-to-clean designs like Skye Plus provide comfort for visitors while enabling staff to fulfil their duties more efficiently.

**Bedroom**  
Bedrooms are private spaces where round-the-clock observation may not be practical. Our safest bedroom ranges are designed to minimize ligature risks and reduce opportunities for damage.

**Outdoor space**  
Products in our Ryno® range are totally water-resistant and UV-stabilized, and can be heavily weighted, making them a safe and durable option for outdoor spaces.

**Day room**  
Lockable wall and floor mounted TV cabinets with durable polycarbonate screens offer protection for equipment, and there is extensive choice in our broad range of sofas.

**RYNO<sup>®</sup>**

**COMBINING**

**EXTRAORDINARY**

**RESILIENCE WITH**

**ORGANIC STYLING**

# RYNO<sup>®</sup>

Ryno products are made to the highest standards and designed to withstand the harshest treatment, representing value for money over their lifetime. All have been created with safety in mind, with all their characteristics resulting in safer settings for users and staff.

**Weatherproof**  
Ryno products are totally water-resistant and UV-stabilized, making them suitable for indoor and outdoor use in all weather below

**Fixing**  
Using our unique hidden fastening methods, Ryno products can be secured to floors and/or walls, deterring weaponization and reducing opportunities for concealment left

**Lifetime guarantee**  
All Ryno products are covered by a lifetime guarantee against manufacturing faults, providing additional peace of mind. right

**Flammability**  
The entire Ryno range is fire-retardant, adding an extra level of safety - complies with CAL 133 and UL94 HB fire standards

**Heavyweight**  
Ryno products can be heavily weighted to make them near-impossible to pick up or throw, to create safer environments

**Strength**  
Their one-piece construction enables Ryno products to withstand extreme treatment, with smooth curves distributing impact evenly throughout the product

**Hygienic**  
The water-resistant nature of Ryno products means they can be easily wiped clean, ready to be used again.

# RYNO<sup>®</sup> MATERIAL

Ryno products are manufactured from a unique polyethylene compound developed to create safe, durable products.

 <p>UV-stabilized</p>	<p>A UV-stabilizing additive protects Ryno products against the damaging effects of the sun's rays, limiting color fading and brittleness when used for extended periods outdoors.</p>
 <p>Flammability</p>	<p>The polymer used to make Ryno products complies with CAL 133 and UL94 HB fire standards.</p>
 <p>Recyclable</p>	<p>Made from 100% recyclable content, when the products reach the end of their useful life, they can be ground down into small granules and used to create new pieces of furniture, reducing their impact on the environment</p>

# RYNO<sup>®</sup> COLORS

A palette of therapeutic hues

Color can play a key role in humanizing healthcare environments, which is why we enlisted the help of SeymourPowell, one of the world's leading design and innovation consultancies, to assist us in selecting a palette of therapeutic hues.

Whether the aim is to create a soothing and reassuring space or provide inclusive stimulation, our unique colors can help to achieve it.

# RYNO<sup>®</sup> BEDROOM

The products in this unique collection are manufactured in a single continuous piece.

This helps to create extremely durable products which, unlike traditional cabinetry, cannot be disassembled to be used as weapons.

The one-piece design also eliminates gaps, making the products totally water-resistant and preventing the concealment of contraband.

Fixed or removable restraints available with fully customizable number of fixings and locations *left*

Optional infill panel minimizes concealment opportunities when positioned against a wall *below*

Innovative hidden floor-fastening options help to create safer spaces for patients and staff

Integrated clothes storage solution minimizes ligature risks *right*

# UNRIVALLED

# REINFORCEMENT

Our sofa ranges come in a variety of shapes, sizes and fabric choices but it is their reinforcement that really sets them apart.

All products are strength tested for severe non-domestic use

# STANDARD VS PLUS?

<b>STANDARD</b>	Enhanced durability for lower risk spaces
	<p>Webbed back</p> <p>+ Reinforced seat adds strength &amp; durability</p> <p>Cloth underside</p>
<b>PLUS</b>	Ideal for extremely challenging environments
	<p>+ Reinforced back adds strength &amp; durability</p> <p>+ Reinforced seat adds strength &amp; durability</p> <p>+ Reinforced underside adds strength &amp; reduces concealment opportunities</p> <p>→ Security screws are also used, where applicable, to minimize potential for tampering</p> <p>→ No use of piping or visible staples reduces ligature risks</p>

# ADORA PLUS

**Adora Plus chair**  
 Single fabric: 1AR1-900  
 Dual fabric: 1AR1-920  
 30.7H | 52.9W | 38.2D (in)  
 Weight: 176.4lbs

**Adora Plus 2.5-seater**  
 Single fabric: 1AR25-900  
 Dual fabric: 1AR25-920  
 30.7H | 82.4W | 38.2D (in)  
 Weight: 262.4lbs

## KEY FEATURES

- Curved design and heavy weight helps to deter lifting
- Durable internal reinforcement
- Zero-depth seams prevent concealment
- Low back helps to improve line-of-sight observation
- Optional hollow piping to minimize ligature risks
- Plinth base prevents dust and dirt from gathering underneath

## OPTIONS

- Available in single or two-tone upholstery
- Wide choice of water-resistant upholstery

*Internal reinforcement and anti-concealment seams as standard*

*Combines sumptuous comfort with durable reinforcement*

# SNUG PLUS CONFIGURATIONS

# OHIO PLUS CONFIGURATIONS

## DE-ESCALATION COUCH

# JAK

In situations where a patient is in severe distress and initial verbal de-escalation techniques have proven ineffective, physical intervention may be used as a last resort to prevent the patient causing harm to themselves and others.

During physical intervention staff will aim to restrict the patient's movements using the minimum force required, maintaining patient dignity. These interventions can be physically demanding, presenting risk of injury.

Through live service evaluations with clinical professionals, every angle of this couch has been optimized to support safer de-escalation practices for patients and staff alike.

### ANGLED DESIGN

- Outer seats angled at 33° to allow closer patient engagement, aiding verbal de-escalation.
- Tapered footwell aides staff in safe de-escalation practices.

### LOWERED CENTRAL SEAT

- Helps to control lateral movement.
- Gives staff superior leg control.

### UPRIGHT SEATING POSITION

- Preserves patient dignity.
- Supports staff in de-escalation processes.

Evidence-based design providing support when it's needed most.

Beneficial for all levels of intervention.

Designed and developed in association with:

Andy Johnston Associates

Andy Johnston is a Clinical Director and independent mental health consultant with over 32 years of experience in mental health services including conflict resolution and physical intervention.

*"Staff body positions are supported throughout a seated intervention - great to see such a design"*

Physical intervention specialist

Weight: 59.5 lbs.

## KEY FEATURES

- Double-stitched seams and non-accessible zips prevent tampering
- Flame-retardant filling gives the bean bags their shape and comfort

## OPTIONS

- Wide choice of water-resistant upholstery (we recommend dark colored vinyl)

*Flame-retardant filling and exterior*

# EVIDENCE BASED DESIGN

As part of the development process of the Boden Rocker, we trialed a prototype at 2 mental health hospitals (Adult and CAMHS) and sought feedback from healthcare professionals.

This valuable feedback helped our design team to refine the design to achieve maximum benefit for the users and caregivers.

✓ **DESIGNED IN ASSOCIATION WITH HDR**

The Boden Rocker was designed in association with Jason Beshore, Health Principal at HDR Architecture.

As part of his work designing behavioral health spaces, he noted patients self-soothing by rocking back and forth on the floor rather than using available rocking chairs. After talking to care providers and conducting research to learn more, Jason presented us with a concept, and our product design team set to work bringing this concept into reality, creating a prototype which was trialed in a live environment.

✓ **TACTILE, PROPRIOCEPTIVE AND VESTIBULAR INPUTS**

The Rocker is designed to provide gentle, controllable vestibular stimulation, helping to comfort and calm those in crisis.

The shape, size and softness of the product also offer tactile (touch) and proprioceptive (sense of body positioning) inputs which provide a supportive feeling of reassuring wrap-around contact.

These attributes are particularly important in mental health settings where staff are unable to provide physical contact like a reassuring hug to those in crisis.

✓ **A SUSTAINABLE CHOICE**

As part of the manufacturing process of our other seating products, small pieces of waste foam are generated. We use this waste foam as fillings for our beanbags, reducing our CO2 emissions.

The plastic base of the Rocker is made from 100% recycled polyethylene

The Boden Rocker is made from 64% recycled content, which means the carbon footprint of the product is reduced from 381 lbs to 104 lbs of CO<sub>2</sub> – a 72% decrease.

*“The patient’s seclusion/restraint episodes decreased in frequency by nearly 75%. When the patient did have episodes of aggression or self-injury, they were significantly shorter and less intense overall”*

Jason Beshore  
Health Principal  
HDR

# BODEN ROCKER

*Rocking motion provides comfort and calm*

**Boden Rocker**  
 1BO1-600  
 30.3"H | 51.1"W | 53.1"D  
 Weight: 88 lbs.

NIGHTINGALE AWARDS 2023 **Gold Award**

NIGHTINGALE AWARDS 2023 **Innovation Award**

## KEY FEATURES

- Gentle, controllable vestibular stimulation provides comfort and calm
- Donut shape provides a reassuring feeling of wrap-around contact
- Close to the ground seating position provides a feeling of safety
- Raised back offers head and neck support
- Large size and weight prevents the beanbag being picked up
- Recycled plastic base which is textured to provide grip and prevent the product moving along the floor
- Made from 64% recycled content, contributing to a 72% reduction in CO2 emissions

## OPTIONS

- Wide choice of water-resistant upholstery (we recommend dark colored vinyl)

→ Heavyweight to deter misuse		

# SOVIE

This range has been designed to provide an ideal safety solution for beds in challenging environments.

Fixed or removable restraints available with fully customizable number of fixings and locations [below](#)

Infill panels can be used to minimize concealment opportunities when positioned against a wall [above](#)

**Strength**  
Internal support ribs provide extra strength and durability

**Water resistance**  
Sovie's one-piece mattress platform has no joints or crevices through which liquid can permeate, preserving hygiene and infection control levels

**Duratec material**  
The Sovie bed is coated in Duratec\* - a tough plastic found in aircraft interiors. It has an extremely durable finish which withstands impact and is resistant to tough chemical cleaners. It is also flame-retardant and anti-bacterial.

*\*white finish uses Duratec,  
hickory uses Epotesch thermoformed plastic*

Strap bar easily removed when not required to minimize ligature risks

Lock barrel remains in place to reduce risk of weaponization

# SCORPIO COLLAPSIBLE

Versatile design serves multiple functions including making it usable for soft seating

The design of our Scorprio collapsible mattress prevents obscuring of vision panels as it ‘collapses’ when stood on end.

	Fire-retardant for added safety and peace of mind		An optional security under layer makes damage more noticeable during staff inspection		Unlike separate pillows, the optional integral pillow cannot be used to as a weapon or to block plumbing
--	---	--	---	--	--

# SCORPIO COLLAPSIBLE

Scorprio Collapsible anti-vandal foam mattress  
 1SOM26-63-3-TRIFOLD-C5  
 3"H | 75"L | 30"W

## FLEX Profiling mattress

**Flex profiling mattress**  
1FLEX910-1930-152-C5  
6H | 76L | 35.8W (in)

Recommended for use with:  
→ Solo MH profiling bed

## FORM Pressure relieving mattress

**Form pressure relieving mattress**  
1FO7-001-5  
7.1H | 74.8L | 35.4W (in)

### KEY FEATURES

- Castellations allow the mattress to flex in both directions, making it suitable for use with our Solo profiling bed
- Hygienic wipe-clean polyurethane cover with water-resistant welded seams
- Compliant with flammability standard BS 6807:2006 Ignition Source 5, Clause 9
- Reversible design means the mattress can be turned regularly for added longevity

### KEY FEATURES

- 5 layers of specialist foam designed to provide long-term comfort and support
- Castellated layer aids air flow and flexibility
- Firm base and sides provide stability
- Hygienic wipe-clean polyurethane cover with water-resistant welded seams
- Compliant with flammability standard BS 6807:2006 Crib Ignition source 5, Clause 9
- Pressure map data available on request

# NORA TEAR-RESISTANT PILLOW

**Nora tear-resistant pillow**  
 1NR-500-GR  
 4.7H | 21.65W | 15.7D (in)  
 Weight: 1.83lb

*Vent allows air to move freely while protecting from fluid entry*

-  Fire retardant Crib 7
-  No pillowcase required
-  Water-resistant
-  Anti-vandal design
-  Recycled foam filling

<b>KEY FEATURES</b>	
<p>Designed for the most demanding environments, Nora is an anti-vandal pillow which complies with the very highest flammability standards, and avoids the need for a pillowcase – something which could otherwise pose a safety risk.</p> <p>Soft to the touch but resistant to damage, Nora’s heavy-duty covering and welded seams work together to create a water-resistant and anti-vandal pillow. An integrated hydrophobic vent allows air to move freely while protecting the interior of the pillow from fluid ingress.</p> <p>Inside, a fire-retardant liner surrounds the supportive filling made from 100% recycled polyester fibre filling. Nora has been tested to Crib Source 7, making it suitable for locked establishments like custodial facilities.</p>	<ul style="list-style-type: none"> <li>→ Heavy duty anti-vandal cover is made for extra challenging environments</li> <li>→ Soft yet secure material is ideal for seclusion</li> <li>→ Hygienic wipe-clean surface</li> <li>→ Breathable design with an air vent fully welded on the side of the pillow</li> <li>→ Rated to Crib Source 7, with a fire-retardant interliner and filling</li> <li>→ No pillowcase needed</li> </ul>

# UPHOLSTERY

We provide an extensive range of water-resistant fabrics and vinyls to ensure that you will find the right finish for your furniture.

## Fabrics

A durable option which combines the comfort of soft fabric with practical water-resistant properties. Please be aware, these fabrics are more susceptible to stains than vinyl.

Call us to request your fabric swatch cards to see the full choice available

## Vinyls

Hard wearing and water-resistant, leather-effect vinyls can be wiped clean which makes them a hygienic and practical option for healthcare environments.

*Look out for ranges available in dual fabrics*

Although we offer a comprehensive range of fabric options, we can use customers' own fabric, or COM, if required.

Check our statement of line pages at the end of each section for COM yardage information for each product.

**Please note:** Cracking and stickiness on vinyl fabrics are known issues to fabric manufacturers. As furniture manufacturers, Pineapple cannot accept responsibility.
