A concealed operating mechanism and simple push-button control enable smooth, secure transitions between positions

UK Registered Design No. 6511361

Pineapple

Developed in association with Dr. Scott Zeller (Founder, EmPATH Consulting)

KEY FEATURES

- Easy chair-to-sleeper conversion with clear operating instructions included
- Wide seat platform for enhanced comfort and support
- High backrest provides comfortable head and upper-body support
- Anti-tip design for improved stability and user safety
- Locking front casters provide secure positioning and easy mobility
- Compact design allows for easy placement and movement through standard doorways
- Concealed lay-flat button for discreet, simple operation
- Comfort-focused design intended for short term use of up to 24 hours

MATERIAL/FABRICATION

The Zeller Sleeper Chair was developed in collaboration with Dr. Scott Zeller, an emergency psychiatrist with nearly 40 years of experience in behavioral healthcare and a leading advocate for EmPATH units (Emergency Psychiatric Assessment, Treatment and Healing).

The chair features a reinforced internal wood frame supported by metal cross members, brackets, and pivot components for strength and stability in both reclined and flat positions. A concealed operating mechanism and simple push-button control allow smooth, secure transitions between positions while helping limit access to moving components.

The seat, backrest, and arms are cushioned with CMHR (combustion-modified high-resilience) foam for lasting support, comfort, and durability.

Integrated swivel and fixed casters allow the chair to be repositioned as needed, while locking casters provide additional stability. Built-in storage features durable metal runners, hinges, and secure magnetic closures, providing convenient storage without compromising the chair's safety-focused design.

OPTIONS

- Single upholstery with storage: 1ZL1-100
- Two-tone upholstery with storage: 1ZL1-120
- Single upholstery without storage: 1ZL1-200
- Two-tone upholstery without storage: 1ZL1-220

FABRICS

Available in a wide range of upholstery options, including water-resistant fabrics and leather. For challenging environments, we strongly recommend a wipeable vinyl.

Please note: All storage drawers are upholstered in black vinyl as standard.

TEST STANDARDS

- Strength and durability tested to BS EN 16139:2013, Test Level 2
- Fire retardancy tested to BS 5852:2006
