

RYNO[®] ADIRONDACK

An iconic design, reimagined
for challenging environments

Pineapple

Developed in association with **Brian Giebink** (Architect | Director of Behavioral and Mental Health at HDR), the **Ryno® Adirondack** reimagines the iconic Adirondack chair for challenging environments. Combining Giebink’s experience in behavioral health design with Ryno®’s focus on strength, safety, and durability, it retains the familiar slatted-back appearance, generous seat platform, and wide armrests of the traditional design, creating a supportive and relaxed seating position.

Its sculpted form brings a more welcoming feel to secure environments, helping create outdoor healthcare spaces that support comfort, dignity, and well-being. Subtle sensory ripple detailing on the arms adds tactility and character, while the

durable, one-piece construction supports safer use without compromising the chair’s familiar aesthetic.

A wide footprint and standard weight of approximately 40 lbs provide reassuring stability, with additional weighting options available where required. Optional floor fixing can further enhance security and help deter misuse. The wall-saver profile also allows the chair to sit closer to walls, supporting more considered space planning.

Made from 100% recyclable, seamless, and non-porous rotationally molded LDPE, the Ryno® Adirondack is durable, water-resistant, UV-stabilized, and easy to clean, making it suitable for both indoor and outdoor use.

WEATHERPROOF | DESIGNED FOR THE OUTDOORS | COME RAIN OR SHINE | UV STABILISED

“

There's an opportunity to introduce something very familiar, comfortable and relaxing to the behavioral health space. Adirondack chairs are a symbol of relaxation, comfort and being outdoors.

”

Brian Giebink, NCARB, AIA, LEED AP BD+C, EDAC, is an architect and Director of Behavioral and Mental Health at HDR, specializing in the design of environments that support safety, well-being, and positive experiences for patients, staff, and visitors. His expertise in behavioral health design brings a practical, human-centered perspective to Pineapple's development of the Ryno® Adirondack.

"I believe it's essential to the patient's healing journey to have access to fresh air and outdoor space"
